

# Nursing Shortage at a Glance

The demand for nurses is higher than ever amid retirement, changing patient demographics that require more health care services, and workforce burnout.

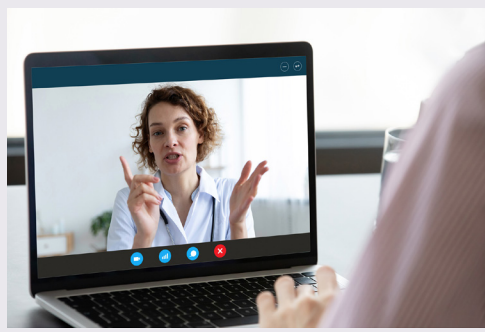

## Conduit Health Partners Addresses Nationwide Nurse Shortages

The past two years have been particularly challenging for nurses, causing many to re-evaluate their careers. Through our suite of innovative solutions that can be tailored to your unique needs, Conduit Health Partners serves as an extension of your team to support your nurses in the delivery of care and reduce burnout amid nationwide nurse shortages.

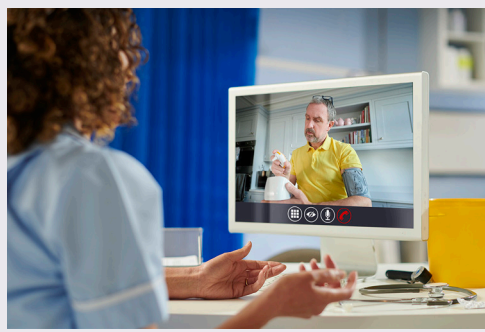

### TRANSFER CENTER:

Our team will expertly manage your patient flow, direct admissions, or consultations 24/7 so that your nurses can focus on their most critical role: providing high-quality patient care.

### VIRTUAL CARE:

Our virtual care solutions, Remote Patient Monitoring, Inpatient Virtual Care and Hospital at Home nurse staffing help provide safe, timely, accessible, and convenient care options to improve patient outcomes.

### 24-7 NURSE-FIRST TRIAGE (ACCESS):

Our nurse call center solutions use a nurse-first model with immediate access to an RN. We can personalize a 24/7 nurse-first triage line, including a workplace injury triage line, a bloodborne pathogen exposure nurse line, or a triage line specific to a health event such as COVID-19.

Conduit's team is comprised of health care leaders and clinicians with strong operational backgrounds and extensive experience developing protocols that use clinical and evidence-based data. With Conduit as a partner, we can help you improve care and access for those you serve, while supporting an improved work-life balance for you and your nurses.
